

YOU MAY HAVE A LEAK!!!

A recent review of your water meter shows continuous use of at least 7 gallons of water per hour at all times of the day and night.

Contact us today to schedule a complimentary Water Wise House Call. We can evaluate your water use indoors and outside and let you know about available rebates.

Sacramento, CA 95821

How to identify the source of a leak

- Visually inspect all faucets, showerheads and your outdoor irrigation system.

- Walk around your house and look for signs of leaks, such as mold, discoloration, or soggy and abnormally green spots in your yard.

- Take the toilet test – Add several drops of food coloring to the tank, wait 20 minutes, check to see if the color of the water in the bowl has changed.

This notice has been sent as a courtesy. Residents are responsible for resolving plumbing leaks on their property in a timely manner.
